

## "THE ENTRE SYSTEM WORKS!"

MEET KRISTIN

"I had been dealing with lymphedema

for about one year and was prescribed the Entre system to help manage my swelling. I noticed immediate relief after using the system for the very first time, and have since made a point to use it every day—even when I travel.

Being young and otherwise healthy, I am extra cautious about being proactive about my condition, in hopes of avoiding problems in the future.

I have seen the critical role the Entre system plays in the management of my chronic condition, and I'm happy to have found something that meets my daily needs."

## EFFECTIVE AT-HOME TREATMENT TO REDUCE SWELLING ASSOCIATED WITH LYMPHEDEMA<sup>1</sup>

The Entre system delivers pneumatic compression—a therapy proven to assist in the successful home management of chronic swelling and venous ulcers associated with lymphedema<sup>1</sup> and chronic venous insufficiency.

With multiple settings and garment options, the Entre system delivers customized treatment to meet your needs.

LOWER EXTREMITY TREATMENT

### KEY FEATURES

- Soft, comfortable garment fabric.
- Easy-grip features provide additional assistance when applying and removing garments.
- Multiple pressure modes and numerous garment options ensure an accurate fit and individualized treatment.
- Eight-chambered garments offer a more targeted treatment.
- Treat up to two affected limbs and decrease overall treatment time.

UPPER EXTREMITY TREATMENT

## IMPROVED HEALTH AT-HOME

In a recent clinical study,<sup>1</sup> patients treating cancer-related lymphedema with a pneumatic compression device like the Entre system experienced a:

**21%** reduction in cellulitis incidence

**29%** reduction in hospitalizations

**32%** reduction in clinic visits

These improved health outcomes helped to significantly reduce overall treatment costs for patients.
