

If you're experiencing chronic swelling, pain, limited mobility and/or skin hardening, it may be lymphedema. It can affect your quality of life, and if left untreated, lymphedema could lead to a serious bacterial skin infection called cellulitis.

The Flexitouch Plus system provides a comfortable and convenient way to manage your chronic swelling from home. It is clinically proven to stimulate your lymphatic system¹ and enhance your quality of life.²

- Our ComfortEase™ garments are designed to be:
- Easy to put and remove with large zipper pulls for daily use
 - Conformed to your body for effective treatment
 - Comfortable due to thinner, less bulky material

How it works.

The Flexitouch Plus system uses a programmable controller that connects to a garment with built-in air chambers. The garment inflates and deflates in a specific order, creating a gentle, wave-like motion. This mimics manual lymphatic drainage, moving excess fluid from the swollen area toward healthier parts of the body where it can be absorbed.

FLEXITOUCH PLUS TREATMENT OVERVIEW

Your program may or may not include the decongestion phase (navy blue).

- 1 Chest and Neck:** Directs fluid from the neck and the chest toward the underarm area (axilla)
- 2 Head:** Directs fluid from head toward the neck
- 3 Head, Neck and Chest:** Directs fluid from head, neck and face toward the healthy regions of the chest, in one continuous motion

Head and neck treatment programs.

Flexitouch Plus can be set up to treat the head, neck, back, underarms and chest. Note additional options not shown include upper and lower extremity.

PRIMARY PROGRAM	SUPPLEMENTAL PROGRAMS	
HEAD, NECK & CHEST Treatment time: 32 minutes	HEAD ONLY Treatment time: 13 minutes	CHEST (OUTWARD) Treatment time: 12 minutes

Tactile Medical has developed the first pneumatic compression therapy specifically designed to treat head and neck lymphedema.

Watch Flexitouch Plus in action:

TIM S.
FLEXITOUCH USER

I call it my most prized possession because it allows me to engage in some normalcy.

Visit tactilemedical.com/patientstories to see Tim's story.

Improved quality of life.

96% of patients reported satisfaction with Flexitouch system treatment²

85% of patients had improvements in activities of daily living²

87% of patients reported increased ability to swallow, less discomfort and a softening of fibrotic tissue²

WE MAKE ORDERING EASY!
